1	329376	Upload Tool Encoding_Add File Encoding Column to the Upload File Status Grid	1	Preconditions: 1. Admin user is part of at least one of the 'Upload Tool' special tool group.				
2			2	Login as Admin user, Navigate to Manage File Uploads and click on 'Accept' link in License Agreement popup,	Admin user will be navigated to Manage File Uploads page.			
3			3	Click on 'Upload Your File Below' drop-down and Select File Type, Upload 'ANSI' encoded file type, Approve the file by providing valid credentials for e-sign. Verify that File encoding format 'UTF-8 /ANSI' is displaying under File Encoding column.	1. ANSI encoded file type will get processed and a record will get added in Upload File Status grid with File details. 2. File encoding type 'UTF-8 / ANSI' will get added in 'File Encoding' column for the processed file.			
4			4	Click on 'Upload Your File Below' drop-down and Select File Type, Upload 'UTF-8' encoded file, Approve the file by providing valid credentials for e-sign. Verify that File encoding format 'UTF-8 /ANSI' is displaying under File Encoding column.	1. UTF-8 encoded file type will get processed and a record will get added in Upload File Status grid with File details. 2. File encoding type 'UTF-8 / ANSI' will get added in 'File Encoding' column for the processed file.			
5			5	Click on 'Upload Your File Below' drop-down and Select File Type, Upload 'UTF-8 with BOM' encoded file, Approve the file by providing valid credentials for e-sign. Verify that File encoding format 'UTF-8 with BOM' is displaying under File Encoding column.	1. 'UTF-8 with BOM' encoded file type will get processed and a record will get added in Upload File Status grid with File details. 2. File encoding type 'UTF-8 with BOM' will get added in 'File Encoding' column for the processed file.			
6			6	Click on 'Upload Your File Below' drop-down and Select File Type, Upload 'UTF-16 LE' encoded file, Approve the file by providing valid credentials for e-sign. Verify that File encoding format 'UTF-16 LE' is displaying under File Encoding column.	1. 'UTF-16 LE' encoded file type will get processed and a record will get added in Upload File Status grid with File details.2. File encoding type 'UTF-16 LE' will get added in 'File Encoding' column for the processed file.			
7			7	Click on 'Upload Your File Below' drop-down and Select File Type, Upload 'UTF-16 BE' encoded file, Approve the file by providing valid credentials for e-sign. Verify that File encoding format 'UTF-16 BE' is displaying under File Encoding column.	1. 'UTF-16 BE' encoded file type will get processed and a record will get added in Upload File Status grid with File details. 2. File encoding type 'UTF-16 BE' will get added in 'File Encoding' column for the processed file.			
8			8	Click on 'Upload Your File Below' drop-down and Select File Type, Upload Unsupported encoded file type. Verify that File encoding type 'Unsupported encoding' is displaying under File Encoding column and 'File Encoding is not Supported' message is displaying in 'File State' column.	1.Unsupported encoded file type will not get processed but a record will get added in Upload File Status grid with File details. 2. File encoding type 'Unsupported encoding' will get added in 'File Encoding' column for the uploaded file. 3. 'File Encoding is not Supported' message will get added in 'File State' column.
